Experience

Java Developer Intern Jan 2026 – Mar 2026

The Developers Arena

- Architected dynamic and scalable software modules adhering to structured object-oriented programming metrics using **Java OOPs** structures and core framework foundations.
- Engineered database parsing routines, implementing **Advanced Collections**, File I/O workflows, and strict memory/class structures.
- Honored with an official certificate citation recognizing **"Outstanding Performance, Technical Excellence, and Successful Completion"** of all target milestones (Verification ID: CERT-202603-EMP20260110-4928).

Key Technical Projects

AI Doctor Voicebot | *Python, Speech AI*

- Formulated system conversational blueprints integrating voice-assisted clinical analysis arrays with interactive dialogue algorithms.

Complete Library Desktop System | *Java, File I/O*

- Designed clean library records tracking desktop UI with local file storage serialization to guarantee data persistence.

E-Commerce Product Hierarchy Engine | *Java, OOPs*

- Developed multi-tier product catalog maps utilizing high-tier polymorphism, data inheritance trees, and search parameters.

Employee & Grade Organizer | *Java Core, CLI*

- Formulated lightweight terminal structures optimizing Garbage Collection, memory allocation rules, and custom collections.

Education

SRM Institute of Science and Technology 2025 – 2029 (Pursuing)

B.Tech in Computer Science Engineering

- **Coursework:** Java OOPs, Data Structures, Algorithms, Database Systems, UI/UX Design, Cyber Security

Higher Secondary Education Completed 2024

Grade 12 – Science & Mathematics Core

Certifications & Leadership

IBM SkillsBuild AI Certificate – ID: 3c804701-1871-4a29-aeeb-4273f6903538 (2026)

MongoDB Academy Basics Certificate – ID: e68d94f6-316d-4aa1-9ac2-8fa184fcfd70 (2025)

Cyber Security Club Member – Executive member contributing to club technical events at SRMIST.

VEGATHON Hackathon Participant – Engaged with agile development routines at RSET Innovation Centre.

Technical Skills

Languages: Java, C, C++, HTML/CSS
Databases: MongoDB
Workflow: Vibe Coding, UI/UX Design, Full-Stack Dev, Object-Oriented Programming
